

**Fiche Technique**  
**Outside - Day**  
Compagnie LPM  
**Piti Peta Hofen Show**

**Show area**

Dimensions : 8m x 6m + 4 m minimum height

Floor : smooth and flat, without holes and bumps

**Stage layout**

- The backstage must be clear of any passage, a wall or curtain is necessary
- Need a space that is isolated for sound and vision
- Front audience
- The audience should be placed so that they can see the floor (best if there is a tribune to seats)
- For optimum enjoyment of the performance, the audience should preferably be positioned as close as possible to the stage

**Sound**

- A mini-jack system (cable access from garden side)
- Front and rear speakers
- Music will be made by Bluetooth control. Therefore the sound control must be close to the stage. (close but not at the back of the stage).

**Other material requirements**

- A 5kl CO2 fire extinguisher to use during the performance
- A skateboard to use during the performance

**Technicians** (*hired by the organiser*)

- Technicians must be available for rehearsals and performances

**Schedule and reception**

- Set-up : 1 hour
- Break-down : 1 hour
- If there is more than one performance per day, 1,5 hour break between each performances is necessary
- Backstage with sanitaries, bathroom/shower, water bottles and catering near to the stage area
- Towels to shower (x3)

**To know :**

During the performance water, shaving foam and lots of sweets are used. This makes the stage dirty. Cleaning is necessary after each performance.
